

# Dementia Risk Calculator

**Dementia  
Risk  
Calculator**

**Step 1:**

**Calculate age-associated risk of Dementia:**

Age	Risk
65	2%
70	4%
75	8%
80	16%
85	32%

\_\_\_ **Age – associated Risk**

**Step 2:**

**Each vascular risk factor approximately doubles the risk:**

\_\_\_ (Age risk) x \_\_\_ (# of vascular risk factors) = \_\_\_ **Vascular-associated Risk**

**Step 3:**

**A positive family history of dementia approximately doubles the risk:**

\_\_\_ (Vascular-adjusted risk) x 2 (if positive family history) = \_\_\_ **Total Risk**

**Step 4:**

**If total risk > 15 – 20 %, then proceed to **Dementia Quick Screen**:**
